Dear Brenda,

We have read over the material you provided for us regarding the voluntary guidelines for Automotive Repair Shop Checklist. Snap-on supports the environmentally responsible use of all our resources. We especially support voluntary compliance as opposed to the need for a more expensive regulatory alternative. The guidelines presented in the material we received were a common sense approach to dealing with pollution concerns of the automotive repair industry.

We will be happy to help in any way we can to support your efforts to keep our city clean and beautiful.

Sincerely,

Tom DeCant
Technical Training Manager
